

Window Color Template: Cows

You can directly colour the template with these two cows or use it to make some nice window color paintings (sometimes called glass paintings). To use the technique window color you need the special window color paint and a transparent foil. Put the paper under the special foil and start to colour your cows. When the colour is dry (which will take a few hours) gently remove your artwork from the foil and attach it to a window, a mirror or a cupboard.

Tell us at <http://www.miaderoca.co.uk/for-children/> how you coloured your cows!

You will find more window colour templates and some other crafty stuff at our MiaDeRoca magazine for alpine lifestyle.
